

FPS VIBRATORY CONVEYORS

SHAKE IT UP!

EFFICIENT DURABLE RELIABLE
CLEAN CUSTOMIZABLE

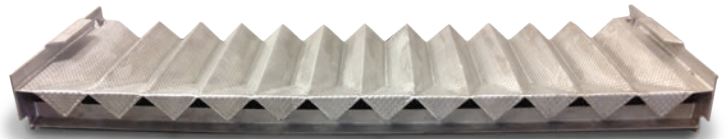

FPS vibratory conveyors can streamline production and solve your unique product-handling challenges. Whether its spreading, aligning, screening, dewatering, sizing or even eliminating human touches on the production line, our experienced application specialists are ready to design the right vibratory solution to fit your operation.

FPS shakers feature sanitary, read-to-eat design. The solid stainless surfaces are easy to clean and can't snag, break or chip like belted conveyors.

Custom Testing and Design

FPS Engineers test a variety of pan configurations, arm angles and motor sizes to ensure your unique product handling goals are achieved.

Ruggedly built with a solid plate frame and cast stainless steel arm mounts, this custom grading shaker will continue to size chicken nuggets and eliminate fines for years.

Vibratory conveyors are great multi-taskers, saving you valuable space on the production line. This custom shaker not only conveys jalapenos, but spreads, dewateres and aligns them for further processing.
